

Teach Me S'more

Cut out these s'more ingredients. Using the instructions given to you by your classmate, build a s'more and paste the ingredients as directed to show your finished treat. Glue your pieces on the next page, or onto a separate piece of paper and share with your class or draw our s'more on your own. Label your components of your finished s'more. You may or may not be instructed to use all of the components below.

My s'more:

Remember to label the parts of your s'more.
